# Cool The Heat Down with These Coolers

Along with summer fun, you need cold drinks to cool things down. To "cool" your summer down, use personalized coolers for beach parties, road trips, or camping trips, so that cold drinks are within arm's reach always.

## Different Types of Coolers

What would life be like without coolers? Truly, these are one of the best inventions ever made. Can you imagine having an outdoor party, a tailgate party, or camping trip without this portable, nonelectric mini fridge at the ready? If you love outdoor parties, you can use coolers to keep food and drinks cold for hours -- and today's coolers are very stylish and come in a lot of different colors besides.

### [Igloo Cooler](#)

Since its introduction to the market in the 1940s, Igloo water coolers have come a long way. The first coolers were [Steel Cooler\(s\)](#). From there on, Igloo went on to develop different coolers. The earliest large cooler was the giant sea chest which could hold 155 quarts of juice or water. The coolers from Igloo may have wheels, swing-up handles, and hatches. Sporting models have heavy-duty wheels to cope with different terrains.

The Igloo line of coolers includes duffel can coolers, metal sheet wrapped cooler, and the Eucalyptus bag cooler with a drain plug, Eucalyptus bench cooler, and backpack coolers with pockets. The list is an extensive one offering more choices and options.

The company offers a one year warranty for their products, except for Icy Tunes and Ice Substitutes. These models go with a 90 day warranty. If you have a problem with your cooler, you can have this fixed or have parts replaced. To get the correct replacement part, note the model and number of the cooler.

The company stands by its products' quality, with plastic coolers specifically engineered to withstand long, hot days. They won't ship, warp, or dent easily. Made of high-density polyethylene for the exterior, and with FDA approved polypropylene on the interior, polyurethane foam has been specially blended by the company for insulation.

### [Zalman Cooler](#)

Zalman has unique coolers, and the Zalman Company uses forced convection cooling. Its second-generation Reserator 2 optimizes performance and has a fan free cooling system for silent operation. It has a radiator, pump and reservoir.

This cooler has a visual alarm that gives you a visual representation of the flow control, and has a VGA water block and aluminum radiator that is anodized. The CPU water block is goldplated, which gives it a stylish look. With the cooling system, you'll never have a problem with function or performance. The cooler has flow control, and it also has a VGA water block and anodized aluminum radiator. The CPU water blockheads goldplating, giving it a sleek appearance; this cooling system will never disappoint in terms of performance or function.

These coolers offer the best of summer, whether you're working or playing. These brands offer the best in cooling needs. However, take a look at other brands, too, so that you can compare price, quality and performance.
