Stylish Coolers To Help Beat The Heat

If you've ever had a time when you wish you could have had help serving drinks to partygoers, your dream has come true. Today, there are [Ice Coolers](#) that have "robotic" features, in that all you have to do is push a button on a wireless remote, and a cooler will do the serving for you. Your friends can have cool drinks wherever and whenever they want them, leaving you to sit in leisure, staying cool even during the hottest summer days.

[RC Cooler Remote](#)

Guess what is remote controlled and can keep drinks cold up to a 30 RC range? The new kid in town holds up to 12 cold drinks. Here's how this Interactive Toy cooler works - the cooler travels in four different directions - forward and reverse and right and left - up to a thirty feet range. C batteries power this little robot for six straight hours. The downside? The batteries are not rechargeable and not included with the purchase.

This robot has a zippered lid so that things are well insulated, and it's expandable AND collapsible, for storage. It also has removable shoulder straps. It should be able to scoot efficiently anywhere, whether indoors or out, as long as the surfaces you expect it to run on are smooth and flat.

Do take care around small children, because the cooler does have small parts that can be hazardous. Keep these out of reach when not in use, and stored safely. This cooler should not be used on terrain that's rough or on sloping terrain. It's best used for patio parties and barbecues, on smooth surfaces.

[Cooling Cooler Power of Different Types](#)

Coolers are very popular, and now, you can use them to keep your home and laptop cooler as well. In terms of quality and cost, this cooler is worth the investment you put into it because it'll cool your laptop by 5.6 degrees. This will keep you and your laptop much cooler, so that you have no more worry of overheated laptops, they're very prized possession.

The cooling fan, too, is also a type of cooling power. The cooling fan uses a sponge-based water filter and the power of evaporation to keep things cool. Because the fan doesn't heat up, it's perfect for those who have allergies or breathing difficulties. It's handheld and portable, and can be used on your desktop. It's battery operated, USB and power socket compatible.

A portable cooler can also help you beat the heat. If you can't withstand the heat while you're working or while you're out of doors, this cooler can help you do just that. Use it when you're hiking, biking, or golfing. It has an internal pump that's heavy-duty, and it turns water into a fine mist. This mist will then cool you, not make you wet. Attach this to a belt or backpack, or to your bike when you use it. It's 3 inches in diameter and 10 inches high, perfect for personal cooling relief.

If the heat is too much for you and you can't get away from it -- and you don't want to put up with your laptop or CPU overheating anymore, these coolers can help you take care of this problem. Ice cold drinks, a cooling fan, and a cooler for your CPU or laptop are always you can handle the heat and cool down. These items can be ordered online from reputable websites, or you can purchase them from regular brick-and-mortar stores, too.
