The Benefits Of Owning A Cooler Fridge

Have you been stuck in circumstances that had you longing for your home fridge? Or didn't you wish coolers could keep drinks and fruits cooler for hours? What you need is something that combines the best features of a fridge and a cooler, the [Cooler Fridge](#).

The Cooler Fridge Explained

Before the invention of the fridge, bottles of wine or butter were stored in the icehouse. In winter people had their nice cold drinks but during the summers they had to content themselves with "lake-chilled" drinks. Perishable food had also to be eaten immediately. Excess food could not be stored - a lamentable fact in those days.

The invention of the refrigerator changed people's lives, and changed industries, too. Now, perishable foods could be stored to be eaten later, and you could shop in bulk and store food in the refrigerator, too. The refrigerator was invented before the cooler.

The first metal cooler invented in the 1940s was a smart but simple solution to a problem. To keep drinking water cold, people relied on ice cubes or drinks chilled in the fridge. But the fridge couldn't be towed to work and ice melted fast. The invention of the cooler also changed lifestyles. The fridge kept food and drinks cold longer - 24/7 but cold food and drinks had a shorter life span in coolers. Combine the features of the two and you have your fridge and cooler in one.

Cooling Excellence

The market has its share of coolers. US brands such as the [Igloo Coolers](#) started it all. For 80 decade since the 1940s Igloo has been churning out colors. The coolers from Igloo have changed looks several times to reflect changing needs and the times but the classics are here to stay albeit with some nice alterations and additions.

The Igloo FRW 154 16 bottle wine cooler works like a cooler and a fridge. The wine bottles are kept secure and at the desired temperature. It's compact size and neat looks makes it a fine addition to the bar area. The framed [Glass Cooler](#) door with invisible handle eliminates the frequent checking of the wine bottles.

What's the Best Choice for Your Cooler/Fridge?

One of the first things you're going to have to think about with your cooler/fridge is its size. For example, a 16 bottle cooler fridge is a good idea if you plan to do a lot of entertaining, but you won't need one that big if you just want to have a glass of wine occasionally. The bigger cooler/fridge devices will of course take more electrical power to run.

Authorized outlets have cooler/fridge models for purchase, and you can also buy them online. Stay cool when you're shopping by doing your shopping online and compare prices to get the best deals. In this way, you can find the perfect cooler/fridge to fit your needs.

When ordering your Igloo cooler/fridge inquires about the packaging. The cooler/fridge can get some nicks or the handle damaged in transit. If the store is within the area, personally see to the packaging and transport.

If you give a lot of parties or want to have a glass of wine quite often, it may be wise to invest in a cooler/fridge. A cooler/fridge can keep champagne the right temperature at all times, too, and you'll be able to serve friends at the drop of a hat if they simply "drop by."
