Three Reasons Why Buyers Love Their Breville Juice Fountain Elite 800jexl

If you have searched for information online about the Breville Juice Fountain Elite 800JEXL, you presumably noticed that it is one of the most popular juicer machines on the market. Most owners give the juicer a top rating and the average rating is 4.5 out of 5. The Breville juicer machines are generally rated very high and they are well known for their powerful motors, simplicity of use and great tasting juice.

Below is a brief list of the Breville Juice Fountain Elite 800JEXL features:

- - One year warranty from the manufacturer
- - It has a 100-fluid-ounce pulp container
- - A user manual with recipes is included
- - The feed tube has a 3-inch opening with a circular opening that allows you to easily juice whole vegetables and fruits
- - It has a modern design with a stainless steel exterior
- - The parts can easily be cleaned in the dish washer
- - The juice fountain has a powerful 1000-watt motor with 2 speed controls
- - A 34-fluid-ounce (1 liter) juicing pitcher

Why owners are satisfied with their Breville Juice Fountain Elite 800JEXL:

1. The juice fountain is very simple to use

The juicer can easily be put together and disassembled. The large 3" tube opening allows you to put vegetables and fruits very quickly and easily into the juice fountain. This saves you much time cutting the ingredients, as you are able to feed it with whole carrots and whole medium sized apples. Fruits and vegetables that contain a lot of juice and are pulp-producing can easily be juiced without problems. The juicer is also able to easily handle long and fibrous vegetables.

The juicer is easy to clean as the parts are dish washer proof. The knife blades and wire mesh are very easy to clean with the supplied brush. A good tip is to use a plastic bag in the pulp container. That will save you time cleaning the pulp container.

2. Effective motor, makes juice quickly

The Breville 800JEXL has a powerful 1000-watt motor with two speeds. The effective motor lets you make juice fast. The juicer is extracting juice very effectively out of the vegetables and fruits, so the pulp gets very dry.

3. The taste of the juice

The taste of the juice is excellent with a great consistency. Though it is claimed that the juice from centrifugal juicers will oxidize more, it does not taste oxidized at all. Because the juice fountain makes juice so quickly, the juice will be very fresh by the time you can drink it. The pulp container makes sure there are almost no pulp in the juice. This is a favorite benefit for owners that like to drink pulp-free juice and it also becomes easier to clean the juicer.

The length of the warranty and the price are the only negative points I have seen buyers mention about the Breville Juice Fountain Elite 800JEXL. Though, the awesome features of the juice fountain is well worth the price tag. The juicer is just as effective as the manufacturer says, it's simple to clean and use, and it makes fresh, great tasting juice.
