# **Top 7 Reasons I Recommend The Breville Juice Fountain Elite 800jexl**

If you are interested in making your own juice to maintain your health, or just want to make homemade juice because you love juice, then you should definitely consider the *breville juice fountain elite 800jexl*, in addition to the Breville series of juicers in general. Breville has a reputation for producing juice makers that are fast, powerful and produce fresh, delicious tasting juice.

Breville 800jexl is a centrifugal juicer. Centrifugal juicers are very fast and have knives that shred the vegetables and fruits into juice. Centrifugal juicers are good at juicing harder fruits and vegetables, but if you are looking to juice leafy vegetables, a masticating juicer machine may be the best alternative. However, one purchaser told me that he could perfectly juice leafy vegetables using the breville 800jexl by putting them into the juicer machine together with hard vegetables or wrapping salads together lengthwise in a roll.

### **7 Reasons Why I Recommend Purchasing The Breville Juice Fountain Elite 800jexl:**

1. It has a wide 3" feed tube, which makes it easy to feed fruits and vegetables very quickly into the machine. This allows you to put in smaller apples without cutting them, or cutting larger apples in quarters. The big feed tube also saves much time as it requires less cutting of the vegetables.
2. The powerful 1000-watt motor makes juice very efficiently. It has two speed controls. It is especially good at juicing harder vegetables and fruits without slowing down or pausing.
3. If you clean it right after using it, it is very easy to clean. The parts are easy to disassemble and clean in soap water or put in the dish washer. A brush is supplied to clean the knives and wire mesh.
4. The juice is very pleasant-tasting. The juice is made very quickly, so it tastes very fresh.
5. The pulp gets very dry, so the juicer is very effective. The pulp container is effectively collecting the pulp, so there is almost no pulp in the juice.
6. The juice maker is of top quality with a modern exterior and a rugged construction.
7. The juicer machine can extract the juice from seven vegetables and fruits in less than a minute and make a large glass of juice. The speed of this juicer is so fast that it will be hard to find another juicer that can beat its time-efficiency.

The breville juice fountain elite 800jexl is simple to use, powerful, quick, easy to clean, has a modern exterior and makes tasty juice. This is why I recommend the juicer machine and the main reasons why the average customer would give the juicer a 4.5 out of 5 rating and the reasons it is one of the most popular juicers for sale.
